

Information file: Wellpath data

Operator: PERTRA AS
Well: 15/12-13 A
Field: VARG SOUTH
Rig: WEST ALPHA
Country: NORWAY

Original Survey Points

The WELLPATH_ORIGINAL_SURVEY_POINTS.PRN file contains the official survey points for the well, as delivered by Halliburton.

Computed wellpath

The WELLPTH_COMPUTED.ASC file contains the official calculated wellpath for the well, at a regular depth interval of 2 meters. The wellpath is calculated using a standard “Minimum Curvature” algorithm.

In the file the original survey points are listed first, with measured depth, inclination and azimuth. Thereafter, the wellpath with measured depth, x-offset, y-offset and true vertical depth.
